

Thuraya XT Satellite Phone

Thuraya XT

Thuraya's new generation Thuraya handset is powerful, ruggedized and compact, offering total convenience and mobility in tough environments.

World's toughest satellite phone

Thuraya XT offers satellite services exclusively in a mobile handset that is as compact and light as a small GSM phone. As the world's toughest satellite phone ever made, the lightweight pocket size phone is designed to meet the highest criteria for splash resistance, dust resistance and shock proofing

Mobility Unlimited

Thuraya XT offers you mobility and a choice to stay connected with Thuraya satellite services in places where terrestrial and GSM communications are unavailable.

In addition, the Global Positioning System feature in the handset facilitates 'location tracking' while roaming in remote and unconnected areas in Thuraya's network.
