

Thuraya SG-2520 satellite phone

GSM Tri-band

This is the only satellite phone that offers also GSM tri-band. Thuraya's tri-band GSM feature allows operation on three different types of GSM networks: 900, 1800 and 1900 MHz offering greater flexibility in high traffic GSM environments with increased phone usability and voice quality in Asia, Africa, Australia, Europe and North America.

Display

An impressive [1.9 inch] 262,000-colour pixel screen interface resembling a desktop computer allows user-friendly navigation of the phone's functions and services.

Internet Mobility

Thuraya SmartPhone is a GPRS enabled phone that allows access to mobile Internet using Thuraya's satellite network anywhere in Thuraya's coverage area. You can also enjoy GPRS capabilities in GSM mode.

Camera

The phone's integrated 1.3 mega pixel camera with 5x digital zoom not only allows you to capture special and important moments but also lets you share them with family, friends and colleagues as an email attachment or MMS from anywhere across Thuraya network.

Video

Advanced streaming media feature allows you to play video clips and slide shows in real time, avoiding laborious file downloading.

Applications

Thuraya SmartPhone is java-enabled phone containing a variety of applications that are compliant for third party Java application installation.

GPS Services

Thuraya SmartPhone offers superior GPS navigation capabilities that allow users to find locations and reach destinations quickly and safely
